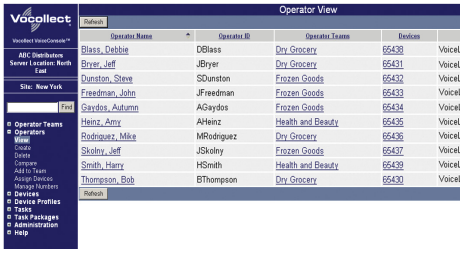
Vocollect VoiceConsole®



One View, Total Visibility

Today's complex operating environment demands cutting-edge management tools that are cost-effective, easy-to-use and flexible in order to adapt to changing business needs. Vocollect VoiceConsole dramatically reduces the time it takes to manage your voice-enabled workforce by providing device management, operator management, configuration management, and system diagnostics all through one main browser-based view – making it easy for you to give your team members what they need, when they need it.

The Flexibility You Want. The Information You Need.

- Provides easy set up and management of your entire Vocollect Voice® system whether you run one DC or hundreds.
- Supports centralized management enabling you to manage all aspects of your voice-enabled workforce from a single console reducing IT support needs across your entire enterprise.
- Supports the industry's leading database platforms for easy integration with your existing hardware and software.
- Makes information instantly available remotely from any web browser.

Simple to Use, Powerful Control

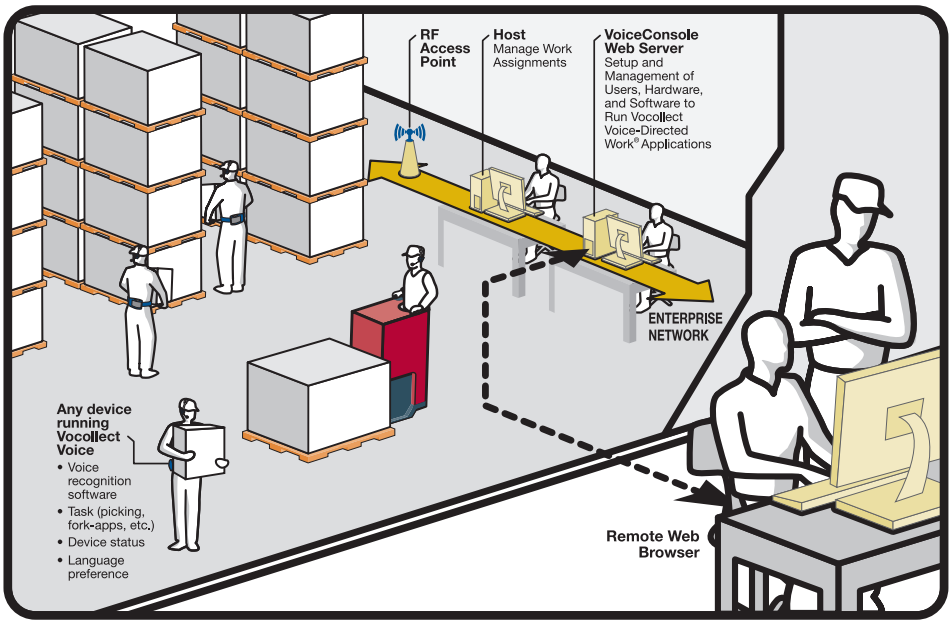
- Manages all Vocollect Voice devices from one place – reducing the time and cost typically associated with configuring and troubleshooting wireless devices.
- Lets you access real-time information and manage your voice system from any location in your enterprise.
- Enables team members to choose their own voice language to easily accommodate diverse workforce requirements.
- Leverages your existing IT staff and infrastructure, reducing your implementation costs.

VoiceConsole's design puts the distribution center workforce "front and center" because the application functionality is driven by warehouse workers' assignments, activities, and where they work in your operations.

Delivering Hands-free and Task Focused Performance

With VoiceConsole, you can easily set up, manage, and monitor Vocollect's Voice-Directed Work® including:

- Load voice applications, such as order selection, put-away, or replenishment onto all devices running Vocollect Voice, enabling workers to be productive from the moment they start their shift.
- Establish groups, such as teams of workers assigned to the same zone in a warehouse, making it easy for supervisors to apply the correct settings to the entire team at once.
- Rapidly define and configure software profiles and packages for easy deployment across your enterprise.
- Remotely load, update, or monitor Vocollect VoiceClient software and provide remote technical support, improving IT management efficiency and procedures.



Specifications

Centralized Management

VoiceConsole enables you to manage your entire enterprise from one location. Users across your enterprise can easily view and manage all Vocollect Voice system components from any web browsers with access to their network.

Operating System

VoiceConsole runs on the Microsoft® Windows® and Red Hat® Linux® operating systems, allowing organizations to leverage existing IT investments and comply with already established best practices.
