

## Vocollect Talkman A720 & A710

---

### Mobile Devices

Today's warehouses and distribution centres require solutions that optimise their operations with business flexibility, while maximising existing technology investments. That is why Honeywell Vocollect solutions are the performance choice for more than one million workers around the world each day. Empowering mobile workers to operate hands-free with voice technology has proven to offer positive worker productivity and business value.

In addition to the Vocollect Talkman A730, Honeywell's mobile device that combines voice and scanning, the Vocollect A720 and A710 mobile devices are options available as part of the Vocollect A700 Solution.

The Vocollect A720 is a voice device with two TCO connectors, identical to those used on prior Talkman devices. This is the best solution for customers who prefer a Talkman A700 Solution that includes support for wireless and wired Vocollect headsets and certified wired peripherals.

The Vocollect A710 is a wireless-only device that is the best fit for voice-only workflows in environments where operators are using Vocollect Bluetooth-enabled headsets and peripherals. This device is also ideal for vehicle-based workflows.

Honeywell understands that every customer has unique requirements when it comes to warehouse and distribution centre needs. Offering our customers a wide range of options is just another way in which Honeywell can help you run a better business with voice.
